Reason for Study
Screening

Vascular Screening

Arterial Screening					Carotid Screening					Aortic Screening
Location	Right		Left			CCA		ICA		ICA/CCA Ratio
	Press	ABI	Press	ABI		PSV	EDV	PSV	EDV	
Brachial	100		100		Right	100	10	358	140	3.6
Dor. Pedis	100	1.00	100	1.00	Left	50	5	200	100	4.0
Post. Tibial	100	1.00	100	1.00						

Aorta Max Diameter
2.00 cm.

Noninvasive screening evaluation of the carotid, aorta, and lower extremity arteries. Examination includes B-mode imaging, color doppler, spectral analysis, continuous wave Doppler, volume pulse waveforms and ankle brachial indices.

Arterial: Absence of disease - normal exam defined as an ankle/brachial index of >.96. No follow-up recommended at this time.

Carotid: Presence of disease of overall significance - >50% diameter reduction defined by the presence of pathology and a peak systolic velocity of >125 cm/sec with documented post stenotic turbulence. Recommend immediate diagnostic examination and vascular surgeon referral within 30 days.

Aortic: Absence of aneurysmal disease - maximum diameter of less than 3.0 cm. No follow-up recommended at this time.
