Reason for Study

Upper Extremity Arterial Exam

Location	Extremity Pressures						Digit Pressures					
	Right			Left			Right at Rest			Left at Rest		
	Press	BI	Waveforms	Press	BI	Waveforms	Press	Index	PPG Waves	Press	Index	PPG Waves
Subclavian			Triphasic			Triphasic						
Axillary			Triphasic			Triphasic						
Brachial	150		Triphasic	152		Triphasic						
Radial	150	0.99	Triphasic	155	1.02	Triphasic						
Ulnar	145	0.95	Triphasic	157	1.03	Triphasic						
Palmer Arch												

Noninvasive arterial examination of the upper extremities using continuous wave doppler, extremity pressure measurements, and/or pulse volume recording waveforms

Findings:

Right: No evidence of segmental pressure decreases of the right upper extremity.
 Reduced waveform in the right thumb.
 Normal Doppler waveforms of the right upper extremity.

Left: No evidence of segmental pressure decreases of the left upper extremity.
 Non-pulsatile waveform in the left thumb.
 Normal Doppler waveforms of the left upper extremity.

Impression:

Right: This exam reveals normal perfusion of right upper extremity.
 Moderately decreased digital pressures are noted of the right upper extremity.

Left: This exam reveals normal perfusion of left upper extremity.
 Severely decreased digital pressures are noted.
