Noninvasive arterial exam of the lower extremities using continuous wave doppler ultrasound to measure systolic ankle pressures and record pedal doppler waveforms.

Findings:

- Right:** Normal ankle pressure index of the right lower extremity.
Normal ankle waveforms of the right lower extremity.
- Left:** Moderately decreased left ankle pressure index consistent with claudication.
Severely decreased left toe pressure index.
Severe ankle waveforms of the left lower extremity.
Reduced waveforms in the left digits.

Impression:

- Right:** This exam reveals normal perfusion of the right lower extremity.
- Left:** This exam reveals moderately decreased perfusion of the left lower extremity.
Severely decreased digital pressures are noted of the left lower extremity.
